

FIVE WAYS to save energy this winter

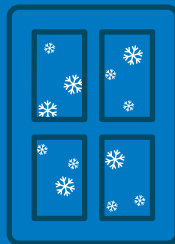

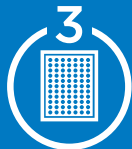

INSPECT

UPGRADE

CHANGE

INSTALL

SEAL

INSPECT

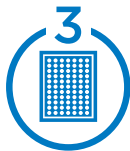

Have your heating system inspected each year by a qualified professional to ensure it is working properly

UPGRADE

Upgrade your old furnace to a new high-efficiency model (newer models can be up to 98% efficient!)

CHANGE

Change or clean your furnace filters each month during the heating season

INSTALL

Install a programmable thermostat to maximize your energy savings

SEAL

Seal leaks around doors and windows with caulk or weatherstripping to reduce unwanted drafts
